Job Title : Manager Information Technology

Department : ICT Department

Reports to : Head ICT

Job Purpose

The Manager Information Technology is accountable for directing the information technology of the company and for all IT functions including critical business applications, IT infrastructure, computer program development, and computer systems operations. Prepares plans and budgets for IT programs and projects, supervises IT staff and aligns the ICT strategy with the corporate Business Plan.

Key Result Areas

- Evaluate business needs and plan for improvements in the information system per the Company strategy.
- Develop frameworks for and evaluate the computer infrastructure to conform to the overall Company policies and in particular IT policies.
- Develop frameworks for and evaluate business application requirements, design, implementation, and support to conform to the overall Company policies and particular IT policies.
- Assess the IT organization and develop staff per the IT strategy and Human Resource policy.
- Plan and support effective, reliable IT-enabled services that meet the company's IT Business Continuity and Disaster Recovery goals.
- Actively participate in the development and implementation of the ICT strategy.

THE PERSON SPECIFICATIONS

- Bachelor's degree in Computer Science or Information Technology or Physical sciences (Maths or Physics) or Electrical/Electronic Engineering or related IT field.
- Must have Post-graduate qualification in a relevant field.
- Must have an IT professional certificate(s) such as Microsoft, Cisco, Oracle, CISA or ITIL
- Certification in project management such as Prince2 or PMP is an added advantage
- 7-10 Years' experience and exposure to enterprise IT environments of which 5 should be at a Senior Level in a large reputable organisation.
- Significant experience working with SAN Storage, Virtualization, LAN, and WAN technologies.
- Working knowledge and experience in API designs, standards, and governance processes
- Knowledge of scalable IT-enabled services in a cloud-based environment and architecting for a cloud hybrid approach is essential.
- Expert proficiency in project planning, developing, and implementing IT systems.
- Must have good analytical and communication skills.
- Can demonstrate a background of personal and strategic leadership.
- Highly motivated to drive self and others to the highest levels of individual and team performance.
